This Book is brought to you for free and open access by the University Special Collections at Digital Commons @ Butler University. It has been accepted for inclusion in Historic Academic Bulletins by an authorized administrator of Digital Commons @ Butler University. For more information, please contact fgaede@butler.edu.

THE
ANNUAL CATALOGUE

—OF—

BUTLER UNIVERSITY.

IRVINGTON, IND.,

FOR THE

TWENTY-SIXTH SESSION,

1880-81.

WITH ANNOUNCEMENTS FOR 1881-82.

INDIANAPOLIS:
WM. B. BURFORD, PRINTER AND BINDER.

1881.

CALENDAR.

ANNOUNCEMENTS FOR 1881.

Athenian Exhibition,	Friday, 8 P. M., June 10
Baccalaureate Address by President Everest,	Sunday, 3 P. M., June 12
Philokurian Exhibition,	Monday evening, June 13
Pythonian Exhibition,	Tuesday evening, June 14
Class Day,	Wednesday, 2 P. M., June 15
Mathesian Exhibition,	Wednesday evening, June 15
Alumni Reunion,	Thursday, 10 A. M., June 16
Undergraduate Address,	Thursday evening, June 16
Commencement Day,	Friday, 9 A. M., June 17

EXAMINATIONS.

Senior examinations close, (1881)	Friday, May 27
Undergraduate Examinations close, (1881)	Tuesday, June 14

ANNIVERSARIES.

Mathesian Society,	May 5
Pythonian Society,	October 19
Athenian Society,	_____
Philokurian Society,	November 6

HOLIDAYS.

Washington's Birthday.
National Thanksgiving Day.
Christmas—New Year's inclusive.

MEETING OF DIRECTORS.

Annual Meeting,	Tuesday, of Commencement week.
Quarterly Meetings,	Second Wednesday of January, April, July and October.

TERMS.

First Term will begin on Tuesday, the 13th day of September, and close on the 23d of the following December.

Second Term will begin on Tuesday, the 3d day of January, 1882, and end on Friday, March 24th.

Third Term will begin on Tuesday, April 4th, and end Friday, June 16th.
Commencement Day, (1882,) June 16th.

DIRECTORS AND TRUSTEES.

ELD. A. I. HOBBS,	Cincinnati, Ohio.
A. C. THOMPSON, Esq.,	Edinburg.

OFFICERS
OF
GOVERNMENT AND INSTRUCTION.

HARVEY W. EVEREST, LL. D., PRESIDENT,
And Professor of Biblical Literature and Moral Science.

ALLEN R. BENTON, LL. D.,
Professor of Mental Science, Anderson Professor of Greek, and Dean of the College of Literature.

THEOPHILUS PARVIN, M. D., LL. D.,
Professor of Obstetrics and Medical and Surgical Diseases of Women.

GRAHAM N. FITCH, M. D.,
Professor of the Principles and Practice of Surgery.

WILLIAM M. THRASHER, A. M.,
Professor of Mathematics and Astronomy.

JOHN A. COMINGOR, M. D.,
Professor of the John S. Bobbs' Chair of Surgery.

CATHARINE MERRILL, A. M.,
Demia Butler Professor of English Language and Literature.

R. N. TODD, M. D.,
Professor of Theory and Practice of Medicine, Clinical Medicine, and Dean of the Medical Faculty.

THOMAS B. HARVEY, M. D.,
Professor of Surgical and Clinical Diseases of Women.

ISAAC C. WALKER, M. D.,
Professor of Diseases of the Mind and Nervous System.

SCOT BUTLER, A. M.,
Professor of Latin Language and Literature.

OLIVER P. HAY, A. M.,
Professor of Chemistry and Natural History.

OFFICERS OF GOVERNMENT AND INSTRUCTION.

WILLIAM B. FLETCHER, M. D.,
Professor of Physiology, Hygiene and Clinical Medicine.

HENRY JAMESON, M. D.,
Professor of Chemistry, Toxicology and Diseases of Children.

HUGH C. GARVIN, A. M.,
Professor of Modern Languages and Literature.

JOHN CHAMBERS, M. D.,
Professor of Anatomy and Clinical Medicine.

C. E. WRIGHT, M. D.,
Professor Materia Medica and Therapeutics.

J. L. THOMPSON, M. D.,
Professor of Diseases of the Eye and Ear.

J. W. MARSEE, M. D.,
Demonstrator of Anatomy.

JAMES H. TAYLOR, M. D.,
Assistant Demonstrator of Anatomy.

ALBERT F. ARMSTRONG, A. M.,
Instructor in Natural History and Superintendent in Laboratory.

WILLIAM F. HAYS, M. D.,
Librarian and Assistant to the Chair of Chemistry.

CALVIN J. FLETCHER,
Curator of Museum.

DEMARCHUS C. BROWN, A. M.,
Instructor in Greek.

E. F. HODGES, M. D.,
JOHN C. WALKER, M. D.,
Preceptors to the Chair of Anatomy.

JAMES A. YOUNG, A. M.,
Instructor in History and Principal of the Academic School.

LEWIS A. PIER,
Instructor in the Academic School.

BUTLER UNIVERSITY.

REQUISITES FOR ADMISSION.

Both Ladies and Gentlemen are received as students.

To enter any department of the Institution, the student will be required in his application paper, which will be furnished him,

1. To present to the President satisfactory evidence of good moral character and sufficient attainments to enter the Institution.

2. To obtain the Treasurer's signature by paying all necessary fees for at least one term.

3. To pass the necessary preliminary examination, and obtain the signature of each Professor whose class he enters.

4. To present his application paper, thus endorsed, to the President, subscribe to the By-Laws of the Institution as a promise of their observance, and receive from him a card of admission to his class.

5. The requisites for admission to the Freshman class may be seen by consulting the Course of Study in the Preparatory Department, pages 27 and 28.

6. For admission to the First Preparatory class, students must give satisfactory evidence of a respectable knowledge of Arithmetic, English Grammar, Modern Geography, and the History of the United States.

7. Candidates for advanced standing must give satisfactory evidence, by examination or otherwise, of proficiency in the studies already passed by the class they propose to enter.

DEPARTMENTS OF STUDY.

The following will exhibit the course of study required for graduation in the Colleges already organized. Additional Colleges will be opened as the wants of the Institution may demand:

I.

BIBLICAL LITERATURE AND MORAL PHILOSOPHY.

H. W. EVEREST, } Professors.
A. R. BENTON, }

In this department the Bible is, and is *in perpetuo* to remain, the text-book. At present two years, the Freshman and Sophomore, are devoted to its study besides a full and elaborate discussion of Christian Evidences during the second and third terms of the Senior year.

In the Freshman year the Old Testament will be studied: during the first term, the Pentateuch; the second term, Joshua, Judges, the books of Samuel, and the books of Kings; the third term, the poetic books and Daniel.

The Sophomore class will study the New Testament; first term, the Gospels; second term, Acts, Thessalonians and Corinthians; third term, the remaining Epistles, specially Romans and Hebrews. The teaching is by lectures, embracing critical examinations of the text, the discussion of the chronology, history, poetry, prophecy, and morality of the Bible, the classes at regular times being required to ask and answer such questions as will assure a proper understanding of the study.

In the Senior year, lectures are delivered on the evidences of Christianity, which embrace not only the general questions of New Testament truth, but also the discussion of so-called "modern skepticism" resting, or supposed to rest, upon modern science. This course of lectures, as well, indeed, as the whole Biblical course, will be found specially beneficial to those young men who intend to enter the ministry, as also to those who have already done so, but have not fully acquainted themselves with these subjects.

Moral Philosophy will be studied during the third term of the Senior year. Instructions will be given in a course of lectures.

POST-GRADUATE BIBLE-COURSE.

This department of study has been extended by the addition of the following post-graduate course—one year is required for its completion:

First Term.—Homiletics, Church History, Hermeneutics, and N. T. Greek or Hebrew.

Second Term.—Scheme of Redemption, Modern Skepticism, N. T. Exegesis, and N. T. Greek or Hebrew.

Third Term.—Modern Skepticism, Pastoral Work, History of Religious Doctrines and N. T. Greek or Hebrew.

The completion of this course will entitle the graduate to his second degree. One who is not prepared to study N. T. Greek or Hebrew, may take in place of these studies, the Bible classes in the regular courses of study. By so doing he can complete an English Bible-Course in one year.

II.

PURE AND APPLIED MATHEMATICS.

W. M. THRASHER, PROFESSOR.

In the Classical and Philosophical courses, Mathematics will embrace Algebra, Geometry, Trigonometry, and their applications to Mechanics and Astronomy.

In the Scientific course will be given, in addition, a tolerably thorough course in Analytical Geometry, Differential and Integral Calculus, and Analytical Mechanics, with an elective course in Theory of Equations, Modern Geometry, Circular Functions, Analytical Mechanics.

Requisites for entering the Freshman Year—Loomis's Higher Algebra to page 306, or an equivalent.

First Term, *Preparatory Course*, may be devoted to elements, factoring, multiple, divisor, equations of first degree, involution, evolution. Second Term—Radicals, equations of second degree, ratio. Third Term—Progressions, binomial theorem, series, logarithmic formulæ and applications, and, possibly, the general theory of equations.

Freshman Year.—First Term—Loomis's Geometry, five books. Second Term—Books 6th to 10th, inclusive. Third Term—Loomis's Plane Trigonometry, and Surveying.

Sophomore Year (Scientific).—First Term—Loomis's Analytical Geometry, plane and solid. Second Term—Loomis's Differential Calculus. Third Term—Wood's Analytical Mechanics.

Junior Year (Scientific).—First Term—Wood's Analytical Mechanics, finished. During the Second and Third Terms they will complete Silliman's Physics.

(Classical and Philosophical).—Text Book—Silliman's Physics. Classical and Philosophical students will devote the First Term to Silliman's Mechanics. They will then be joined by the Scientifics, at the beginning of the Second Term, and the Physics will be completed by the three classes together during the remainder of the Junior year.

Senior Year. First Term—The necessary formulæ of Spherical Trigonometry will be mastered, after which Loomis's Treatise on Astronomy will be completed.

SPECIAL WORK.

Students desiring a more exhaustive mathematical knowledge than is possible in the general scheme, can arrange a one or two years' course in Theory of Equations, Modern Geometry, Circular Functions, Determinants, Analytical Geometry in plane and space, Calculus, Mechanics, and Theoretical Astronomy.

The course and text-books can be determined by letter, or personal consultation with the Professor of Department.

III.

ENGLISH LITERATURE.

CATHARINE MERRILL, PROFESSOR.

Before entering the Freshman Class, the student must be well-grounded in Grammar and the elements of Rhetoric.

In the Freshman class he is exercised in original composition, in themes on historical subjects, in filling out notes taken by himself from class lectures on Early English History, in the study of Hales' Longer English Poems of Shakespeare's Julius Cæsar, and of Lounsbury's History of the English Language.

The Sophomore writes themes on historical and literary subjects in connection with the study of Green's "History of the English People."

The Junior studies Bacon, Shakespeare, Milton and Wordsworth, and, by means of class lectures, Modern European History.

The Senior makes use of the Primer of English Literature, in connection with various works of English and American Authors.

Seniors and Juniors write critical essays.

Original productions, after receiving the private criticisms of the Professor, are read in the presence of the class, and are criticised by the class.

Books of reference, with which every student should supply himself, are the following: Bright's History of England, Epoch Series of Modern History, and Ward's English Poets.

IV.

LATIN LANGUAGE AND LITERATURE.

SCOT BUTLER. PROFESSOR.

Students of Science take only the preparatory course in Latin; students of Arts and Philosophy take also the college course. Applicants for admission to advanced classes must pass examination on the work which precedes. In writing Latin, the quantities must be marked; in pronunciation the revived Latin method is followed.

The following are the text-books used: Chase and Stuart's Classical Series, Allen and Greenough's Latin Grammar, Leighton's Latin Lessons, Allen's Latin Composition, Leighton's History of Rome, Bender's Roman Literature.

The following books of reference are required: White's Junior Student's Latin-English Lexicon, Smith's Classical Dictionary, Long's or Ginn & Heath's Classical Atlas, Brambach's Latin Orthography, Döderlein's Latin Synonyms.

ANNOUNCEMENTS FOR THE SESSION OF 1881-82.

The First Preparatory class will begin the study of Latin grammar, having, in connection with grammar lessons, easy exercises in translation (Leighton's lessons); in the third term will read the first Book of Caesar's Commentaries.

In the Second Preparatory class three books of Caesar's Commentaries will be read in the first and second terms, and two of Cicero's Orations against Catiline in the third term. The class will go over last year's work in the grammar, and, beginning at the sixteenth lesson of Leighton's Latin Lessons, will translate all the English sentences into Latin.

Freshmen will read first term, three of Cicero's Orations; second and third terms, four books of Virgil's *Aeneid*; will have lessons in Latin composition and in Roman History throughout the year.

Sophomores will read, first term, the twenty-first or twenty-second book of Livy; second term, selected Odes and Epodes of Horace; third term, Horace's Epistle II. and Art of Poetry; will have lessons in Latin composition through the first and second terms, and in the third term will review Latin grammar and study the history of Roman literature.

Juniors will read, during the first and second terms, selected parts of Cicero's Tusculan Disputations, Old Age, Friendship, and dream of Scipio.

V.

THE GREEK LANGUAGE AND LITERATURE.

A. R. BENTON, PROFESSOR.

For admission to the Freshman class students will be required to pass an examination on all the general principles of Greek grammar except Prosody, on Jones' Greek Prose Composition or Leighton's or Boise's Lessons in Greek or an equivalent (the English exercises to be translated into Greek with the accents,) and on one book of Xenophon's *Anabasis*.

The Preparatory class will use Leighton's Greek Lessons, and Hadley's Greek grammar, will study Jones' Greek Prose Composition, and Xenophon's *Anabasis* (Boise) one term.

The Freshman class will read the *Anabasis* (Boise) one term, an oration of Lysias the second term, and Homer's *Iliad* the third term. A daily drill in Greek Prose Composition (Jones) will be continued through the year. Particular attention will be given to Prosody and scanning during the study of Homer and to the History of Greece (Smith) from the earliest period to the end of the Persian war, including discussions on the origin of Homeric poems.

The Sophomore class will read Homer (Boise) the first, Thucydides the second, and Plato's *Apology* and *Crito* (Tyler) the third term. They will be required to study the History of Greece from the close of the Persian wars to the close of the Peloponnesian war; also Grote's chapter on Socrates, and Seeman's *Mythology*. Special attention will be given to securing an elegant English version of the authors read.

The Junior class will read Demosthenes de Corona (D. Ooge) during the first term, and a Greek tragedy of Æschylus, Sophocles or Euripides during the second term. It will be the constant aim in reading these authors to express their meaning in concise and vigorous English. The History of Greece during the Macedonian Supremacy will be studied. Twice a week during the third term the History of Greek Literature will be taught, partly by means of a text-book and partly by lectures. Select passages in various authors not previously read may be given the class for translation.

BOOKS OF REFERENCE.

Every student in the College classes should be provided with a good History of Greece, Classical Atlas, Classical Dictionary and Greek-English Lexicon. A. Keith Johnson's Classical Atlas, Anthon's or Smith's Classical Dictionary.

VI.

INTELLECTUAL AND POLITICAL PHILOSOPHY, LOGIC AND RHETORIC.

A. R. BENTON, PROFESSOR AND DEAN OF THE COLLEGE OF LITERATURE.

I. Instruction in Psychology is given by means of lectures, and a text-book. Lectures are given in order to introduce new topics, not treated in the text-book, or to give more ample discussion to subjects but partially treated by the author. Class discussions on controverted points are encouraged, and essays are required. Haven is used as a text-book. A course of lectures on the History of Philosophy is delivered the second term of the Senior year—two lectures per week.

II. Political Economy is taught chiefly by a text-book; and incidentally, questions of sociology are discussed. There are four exercises per week, the second term of the Senior year. Perry is used as a text-book. Also, a course of lectures on the Constitution of the United States is delivered to the Senior class—two lectures each week—the second term of the Senior year.

III. Logic is taught by lectures, and a text-book. The nature and laws of thought are taught by lectures, and formal logic by a text-book. For the latter purpose Coppee is used.

IV. In Rhetoric, as taught in the Senior year, chief attention is given to the nature and use of figures; the arrangement of arguments in discourse; and criticism of style. Bain is used as a text-book; but special lectures are given,

and praxis required of the classes in Logic and Rhetoric. Also, a course of lectures will be given on General Literature, extending through the second term—two lectures per week.

The studies of a Post-Graduate course taught by the Professor of this department, are as follows: History of Philosophy, History of Civilization, History of the Constitution of the United States, Constitutional History of England, and Introduction to Roman Law.

VII.

NATURAL HISTORY.

Q. P. HAY, PROFESSOR.

The instruction in this department is given by means of lectures, recitations, laboratory practice and occasional written examinations.

The Freshman will devote the first two terms to the study of Invertebrates. During the third term they will work on birds or fishes, and be taught to identify species and how to make and preserve collections. For these purposes the collections in the cabinet are available. Frequent excursions will be made to interesting points.

Physiology is taught during the first half of the Sophomore year. In this branch Huxley's Physiology is used as a text-book. Histology will be illustrated by numerous microscopical preparations.

Botany occupies the remainder of the year, a part of the third term being devoted to the determination and study of species of plants. Each student is required to prepare an herbarium. Prantl and Vine's text-books of Botany will be used in preparing for recitations, and Gray's manual in analyzing. Lectures will also be given by the professor. Zoölogy and Comparative Anatomy are taught during the first and second terms of the Junior year. These two terms will be occupied principally in the study of the anatomy of some class of Vertebrates. Huxley's Anatomy of Vertebrates will be used in connection with this study.

Meteorology will be taken up at the beginning of the third term.

Geology will be studied during the first and second terms of the Senior year. Dana's Manual or Lyell's Elements will be the text-book. During the second term the student will be expected to study and identify the fossils of some geological age. Mineralogy will be taught in connection with geology. In the third term

of each year occasional excursions to points of interest and more or less of field-work are required. Post-Graduate courses of instruction will be given, if desired, in Zoölogy, Comparative Anatomy, Palæontology, and Microscopy.

Students entering the Freshman class will be required to pass an examination in the following subjects or an equivalent: Physical Geography, Natural History. Instruction in these branches will be given in the Preparatory Department, during the first year.

VIII.

PHYSICS AND CHEMISTRY.

INSTRUCTION BY PROFESSORS THRASHER AND HAY.

In the course of Arts and Philosophy, Physics will occupy the Junior year. The text-book will be Silliman's Physics.

In the Scientific course, Wood's Mechanics will be taught during the first term of the Junior year. The class will then begin at page 148 of Silliman's Physics and finish the work the second and third terms.

Students in each of the three courses will begin Chemistry with the first term of the Junior year, using Youman's class-book of Chemistry. This term, only, will be required for the course of Arts; while the Scientific and Philosophical courses will require the entire year. Craft's Qualitative Analysis will be the text-book during the second term. Lectures will be given the class during the second and third terms, and during this time, also, three hours of laboratory practice will be required per week. The chemical laboratory is provided with all the necessary apparatus and chemicals for the study of Quantitative and Qualitative Analysis.

IX.

MODERN LANGUAGES.

H. C. GARVIN, PROFESSOR.

The Scientific and Philosophical courses comprise five terms of French and seven of German (including three terms of the latter in the second Preparatory year.) In the Classical course, French and German are elective in the second and

third terms of the Junior year. Throughout the course vigorous drill in grammar and composition goes hand in hand with the reading and translation of literary masterpieces. Each reading lesson is made the basis of a conversation in the language of the lesson.

GERMAN.

Candidates for admission to the Freshman class (Scientific and Philosophical courses) are required to pass an examination in the whole of Comfort's German Course, Part 1, including the exercises for translation into German, and in the first fifty pages of Whitney's German Reader. Equivalents are accepted.

Freshman Year.—During the whole of this year reading alternates with composition. Whitney's German Reader is read during the fall term, Lessing's Minna von Barnhelm (Whitney) in the winter term, and selections from Goethe's prose (Hart) in the spring term. The text-books in German Composition are Joynes' "Exercises for Translating English into German" and Whitney's German Grammar.

Sophomore Year.—Fall Term.—Schiller's Piccolomini (Hart) and Wallenstein are read, and instruction is given in German History, Geography and Literature.

FRENCH.

Sophomore Year.—Instruction in French begins in the winter term of the Sophomore year. Text-books: Wall's French Grammar, and Böcher's French Reader.

Junior Year.—In the *fall term*, one or two modern plays will be read.

In the *winter term*, Moliere's Misanthrope will be read, and the *spring term*, "La Petite Fadette," by George Sand (Böcher).

Advanced German and French will be taught, if elected, in the Senior year. Special classes may also be formed in Spanish and Italian.

BOOKS OF REFERENCE.

Every student in this department should be provided with the following works: Whitney's German Dictionary, Gasc's French Dictionary, Taylor's, or Sime's, or Charlton Lewis' Manual of German History, Hosmer's History of German Literature, "The Student's History of France" and a history of French Literature, that by Van Laun being the best. An Historical Atlas is also essential; Putnam's Series is good. The University Library contains several great works of reference, such as the dictionaries of Sanders, Littré, etc., which are valuable aids to the advanced student.

EDUCATIONAL AUXILIARIES.

I.

LECTURES.

Lectures will be delivered by members of the Faculty, Friday mornings, before the whole school; and also special lectures will be delivered by the Professors of the various Departments in elucidation of the subjects of the text-books.

II.

RHETORICAL EXERCISES.

In addition to the requirements in English literature, as indicated in the various courses of study, critical essays will be required of the several classes, on subjects pertinent to their different branches of study.

III.

LITERARY SOCIETIES.

Four Literary Societies are now organized and in successful operation at the University. These are the Mathesian, Pythonian and Philokurian, composed of young gentlemen, and the Athenian, of young ladies.

All these Societies are, by the By-Laws of the University, placed under the supervision of the Faculty.

The Athenian receives the care and attention of Miss. Merrill.

These Societies, properly conducted, are very important agencies in the social and literary culture of the students of the Institution. Well selected libraries, accessible to the members of the Societies, give important additional means of culture. Contributions to them will be thankfully received.

IV.

COLLECTIONS IN NATURAL HISTORY.

The Cabinet of the University has been largely increased during the past year. It now consists of the following collections:

1. A collection of fossils, minerals, marine shells, etc., purchased of Mr. W. D. Frazee, of Santa Barbara, California. This, with a similar collection of fossils presented by Mr. Van Tuyl, of Ohio, affords a very complete illustration of the rocks and fossils of the different geological ages. The species found in this State are especially well represented.

2. A collection of the marine animals of the coast of Massachusetts, made by Professor Jordan, at Cape Cod, and at New Haven, Conn., by Professor Hay

3. A collection of about one hundred and fifty species of fishes, preserved in alcohol, representing very completely the fish-fauna of the Ohio valley and the great Lake region.

4. A collection of about four hundred species of land and fresh water shells, recently purchased of Mr. J. W. Byrkit, including most of the Unios of the Mississippi valley.

5. A collection of about four hundred and fifty species of marine shells, chiefly from the Pacific Ocean, purchased of Mr. J. W. Byrkit.

6. A collection of Indiana Lepidoptera, purchased of Mr. Byrkit.

7. A number of skins of birds and mammals.

8. A small herbarium, including native flowering plants, and more than a hundred species of mosses.

9. A very considerable number of stone implements and other specimens illustrative of Ethnology.

10. A collection of reptiles, fishes, etc., made by Professor Jordan and Mr. Gilbert in the Allegheny region of the Southern States during the scientific expeditions of the past three summers. This collection is of much importance, as it includes the original types of upwards of fifty new species described by Professor Jordan in the Annals of the New York Lyceum of Natural History and the Bulletins of the United States National Museum. Duplicate specimens of these species are now offered in exchange.

11. A collection of marine animals of the coast of North Carolina, obtained by the scientific expedition of 1878, at Beaufort. These are described in the "Proceedings of the United States National Museum for 1879."

12. A large series of marine fishes—duplicates procured from the United States National Museum. Of these more than one hundred and thirty species have been received during the present year.

13. A collection of about 1,000 insects, deposited by Professor Hay.

14. A collection of fishes and reptiles made during the present year in Mississippi, by Professor Hay. The fishes of this collection have been described by Professor Hay in the "Proceedings of the National Museum" for 1880. Fifty-six species are named of which sixteen are new, and hitherto undescribed.

15. A collection of cretaceous and tertiary fossils, made also in Mississippi, by Professor Hay.

16. A collection of geological specimens made in Northern Michigan by Prof. Jas. A. Young.

In the Department of American Ichthyology, the collection in the possession of Butler University is the largest in the United States outside of Washington, Philadelphia and Boston.

It is hoped that the friends of this Institution will, whenever opportunity offers, forward specimens illustrative of any department of Natural History.

UNIVERSITY LIBRARY AND READING-ROOM.

The University Library contains about 1500 volumes—many of them quite costly and rare—of the representative, and, intrinsically, most valuable books in each of the great departments of literature and science. In science, only the latest and best have been chosen, the rapidly progressive character of some of the sciences having rendered many books, valuable twenty-five years since, now almost obsolete. In literature, those authors whom the verdict of ages has approved are well represented. Students will find the best cyclopedias, lexicons and maps, as well as manuals of special sciences, on the shelves. The scientific books are, many of them, exhaustive, and fully sufficient for the demands of any special or post-graduate course.

THE READING-ROOM.

The best weeklies, monthlies and quarterlies of England, France, Germany and America come regularly to the table of the Reading-room attached to the Library. These, together with the books of the Library, are daily accessible, for reading and reference, to all the students of the Institution.

A yearly appropriation, for furnishing the Library with exhaustive works of reference in the various branches taught in the University, will be made.

ORDER.

I.

IN CHAPEL.

Each student, at the beginning of each term, will be assigned to a seat in the Chapel, which he will be expected to keep for the term. Perfect decorum, and entire abstinence from whispering, reading, and all overt demonstrations of approval or disapproval, will be required. Students will stand during prayer. At all Chapel exercises, students are expected to be in their seats when the bell ceases to ring.

II.

CLASS ROOM.

Entire abstinence from intercommunication, and perfect quiet and attention to the recitation are here required.

III.

COLLEGE BUILDING.

No student will be allowed to remain in the halls during recitation hours. At the ringing of each successive bell, the classes will be dismissed, and will proceed without delay to the room of the next recitation. Students not reciting will, unless expressly permitted to study elsewhere, be seated in one of the recitation rooms assigned for the purpose. Generally, they will be required to remain in the room where they recited last, until their next recitation.

IV.

COLLEGE GROUNDS.

Students are not permitted to remain on the Campus, even for study, during recitation hours; and any loitering or playing in the Campus within that time will be considered highly disorderly.

V.

GENERAL BEHAVIOR.

Courteous and respectful deportment of students toward one another, and toward the officers and Faculty of the Institution, and a careful observance of by-laws as to character and conduct, will be necessary conditions of a continued connection with the University.

VI.

CHURCH.

Each student will be required to attend Church at least once each Lord's day.

VII.

UNEXCUSED ABSENCES.

An aggregate of ten unexcused absences from recitations, church and chapel, will dismiss a student from the Institution.

COLLEGE EXAMINATIONS.

I.

DAILY CLASS.

The daily examinations of lessons will be conducted according to the best judgment of the Professor in charge. Careful attention will be given in all cases to secure the use of correct words and sentences. The prime objects of the recitation will be to test the student's preparation, and to develop his logical ability and capacity for expression.

II.

TERM.

At the close of each term all the classes will be examined on the branches pursued during the term. These examinations will be entirely written, or partly

written and partly oral, as the Faculty may determine. They will always be open for the attendance of visitors; the aim, however, will not be to make them a source of entertainment to visitors, but a rigid test of the student's knowledge.

III.

SENIOR.

The Senior class will be examined on the studies of the Senior year three weeks before Commencement Day.

COLLEGE RECORDS.

I.

MATRICULATION.

In the Matriculation Book of the University each student will record his name and age, and the name and post-office address of his parent or guardian.

II.

CHAPEL.

The college roll will be called every Monday morning, and students will report their absences, if any, from church. Generally, only sickness will be regarded as a valid excuse.

III.

DAILY.

In a Class Book, kept by each Professor, will be entered daily a record of the proficiency, deportment and attendance of each member of the class, from which his class-standing will be determined.

IV.

TERM.

From his class-standing, and the result of his examination at the close of each term, his final standing will be determined, which will be recorded on the University Record for future reference.

V.

TERM REPORTS.

During the last week of each term, a report of the department, attendance and proficiency of each student will be prepared and sent to the parent or guardian.

DEGREES.

I. The degree of Bachelor of Arts is conferred on students who complete the studies in the course of Arts and pass the examinations in the same.

II. The degree of Bachelor of Science is conferred on students who complete the studies in the course of science and pass the examinations in the same. This degree may be conferred also on students in special studies, whenever the special work done shall be deemed by the Faculty a full equivalent for the part of the Scientific course which may have been omitted.

III. The degree of Bachelor of Philosophy is conferred on students who complete the studies in the course of Philosophy and pass the examinations in the same.

No Bachelor's degree will be conferred on any person who may not have studied at least one year in this University.

IV. (1) The degree of Master of Arts, Master of Science or Master of Philosophy will be conferred on any student who shall have taken the corresponding Bachelor's degree at this University on the following conditions: (a) When such student shall have pursued a post-graduate course of study for one year under the direction of the Faculty, have passed a satisfactory examination and have presented an approved thesis on some one of the subjects chosen for examination; or (b)

When after not less than three years from the time of receiving the Bachelor's degree, such student shall have given satisfactory evidence of having been engaged in some literary or professional pursuit, and shall present to the Faculty an approved thesis on some subject of research. (2) Any of the above named Master's degrees may be conferred on any person who may have taken the corresponding Bachelor's degree at any other institution authorized by law to confer such degree when he shall have given to the Faculty satisfactory evidence of scholarship, have pursued a post-graduate course of study under the direction of the Faculty, and have presented an approved thesis on some one of the subjects chosen for examination.

V. The degree of Doctor of Philosophy will be conferred on graduates of this University or of any other institution authorized to confer Bachelor's degrees, who by special study in some department of Science, Literature or Philosophy may have obtained eminence as original investigators, and shall present to the Faculty a meritorious thesis based on such investigations.]

VI. The honorary degree of A. M. or LL. D. will be conferred occasionally on persons who in addition to possessing fair scholarship may have obtained eminence in some pursuit or profession.

The above degrees will be conferred by the Board of Directors upon the recommendation of the Faculty of the College to which the candidate belongs. A fee of ten dollars must accompany the application for the degree, which will be returned if the degree be not conferred.

DIPLOMAS.

When a degree has been conferred, a diploma will be presented without further charge.

DEGREES CONFERRED.

The Board at the last Annual Meeting, conferred the degree of Master of Arts upon D. C. Brown, W. J. Lhaman, James A. Young, and A. F. Armstrong; and the degree of Master of Science upon John T. Burton, and Alembert W. Brayton.

FEES.

IN COLLEGE.

Tuition fee	per term, \$ 6 00
Incidental fee	" 8 00
Apparatus and Library fee	" 1 00
Graduation fee	" 10 00

IN PREPARATORY DEPARTMENT.

Tuition fee	per term, \$6 00
Incidental fee	" 8 00
Apparatus and Library fee	" 1 00

IN ACADEMIC DEPARTMENT.

Tuition fee	per term, \$8 00
Apparatus and Library fee	" 1 00

IN BIBLE DEPARTMENT.

Tuition and all other fees	Free.
--------------------------------------	-------

Tuition fees in College and Preparatory School may be paid in interest scrip or cash. Other fees cash. Scrip can always be obtained for a small per cent. of its nominal value, so that the aggregate of fees, per term, need not exceed ten dollars. Term fees must be paid before admission to recitations.

BOARDING.

Board can be had in the best of private families for \$3.50 to \$4.50 per week. Students who "club" or rent rooms can live comfortably on one-half the above rates; and houses or rooms in houses near the University can be had at low rates. Quite a number of large, new houses can be rented cheaply, by families who desire to remove to Irvington for the purpose of educating their children, and those who wish to make permanent homes here will find property both desirable and cheap.

During the Spring term, a Gentlemen's Boarding Hall has been in successful operation. This Hall is in charge of a competent steward, and though not conducted on the "club" system, yet it has supplied furnished rooms and table board at \$2.50 per week.

LOCATION AND BUILDINGS.

The College of Literature, Science, and the Arts is situated at *Irvington*, a suburb of Indianapolis, four miles east of the city, on the Pittsburgh, Cincinnati and St. Louis, and the Cincinnati, Hamilton and Indianapolis Railways; it is also connected with Indianapolis by street-cars making trips every hour. Irvington is tastefully laid out among forest trees, with well graveled streets and walks. It has two churches—Christian and Methodist—a fine public school building and a graded school of high order. It is a healthy locality, free from saloons and places of amusement. The University Building is large, new, and supplied with every convenience.

The Medical College is located in Indianapolis, on the corner of Pennsylvania and Maryland Streets. The last session of this College was held in its new buildings.

Chemistry 4	Constitution U. S. . . 2	Æsthetics 3
New Testament 2	New Testament 2	Moral Philosophy . . . 3

The Latin of this course may be replaced with German or French.

ACADEMIC.

In this department the following classes will be organized at the beginning of every term, and term after term will go over the same ground:

Arithmetic—Two classes, beginning and advanced.

Grammar—Two Classes, beginning and advanced.

Geography, Physiology, History of the United States, Penmanship, Elocution and Book-keeping.

MUSIC.

As an education is incomplete without some knowledge of Music, theoretical and practical, the Board of Trustees has instituted a Department of Music in which will be given the best instruction and training. The course will include vocal music and voice culture, and instrumental music—Organ, Piano and Violin. Lessons will be given to single pupils and to classes after the best Conservatory Methods. Tuition will be at ordinary rates.

PROF. AUG. G. REICHERT will have charge of this department. He is a graduate of the New England Conservatory of Music, and lately of Eminence College, Kentucky.

REMARKS.

By inspecting the foregoing courses of study, it will be seen that they are such as to meet the wants of nearly all classes of students. There are three extensive and complete University courses, the Classical, the Scientific and the Philosophical. These are preceded by two years of Preparatory study, and the completion of any one of these courses entitles the graduate to a Degree.

The Post-Graduate Bible-Course, together with the Bible classes of the Freshman, Sophomore and Senior years, presents a complete course of Bible study. The attention of those preparing for the Ministry, whether they can spend but one year in such preparation, or whether they are graduates of this or any other institution, is invited to this course.

The English-Latin course is designed to meet the wants of those who can not spend a long time in school, and who desire to prepare well for teaching in the public schools and for business.

The Academic classes will meet the wants of those not well grounded in the elementary studies, or who may wish to review, in one or more terms, the common-school branches. Teachers will find these classes always in progress.

Students entering the University will select one of the courses laid down, and in no case will a change be allowed during term time, nor will any irregularity in classification be allowed, except by special permission.

The Medical College of Indiana

Is the corporate name of the Institution formed by the union of the Indiana Medical College and the College of Physicians and Surgeons of Indiana, a union consummated in deference to the views of the Medical Profession throughout the State. The success which has attended this concentration of the resources and patronage of the two Colleges has already very fully exemplified the soundness of the maxim that "in union there is strength."

ANNOUNCEMENT FOR 1881-82.

In making the present announcement for the session of 1881-82, the Faculty of the Medical College of Indiana desire to express to the patrons and friends thereof the assurance of their deep appreciation of the liberal support of which this College has from the first been the recipient, a support which has been manifested in the shape of a constantly increasing attendance of students from year to year.

Duly realizing the fact that the continuance of this increasing prosperity must depend upon the success of our efforts to deserve it, we shall not fail, as opportunity may offer, to reinforce our present enlarged means and facilities for imparting instruction, with whatever improvements experience may approve or scientific progress may afford.

THE NEW COLLEGE BUILDING.

The new College Building, which was completed in time for the session of 1880-81, is located on the corner of Maryland and Pennsylvania Streets. A more advantageous location could not have been selected; it is near the center of the city, yet sufficiently removed from the disturbing noise and bustle incident to the main thoroughfares of commercial activity; it is conveniently near the point whence the street-railway lines radiate in all directions, but two squares from the post-office, and in easy and speedy communication with the City Hospital and other localities which the student may have occasion to visit during his stay in the city.

The building itself, having been constructed for the sole use and occupancy of this College, is perfectly adapted to its purpose, ample in capacity, convenient and agreeable in its various subdivisions, and thorough and complete in its appointments. The provisions for warming and ventilating the building leave nothing to be desired in these respects, and the plan is such as to freely admit the sunlight throughout all the various apartments. Large air-shafts penetrate every apartment and empty into a central stack, which has its foundation in the cellar and is

carried several feet above the roof. The entire building will be warmed by steam, with the most effective appliances for that purpose, securing an equable and healthful temperature at all times, and obviating the dangers and inconveniences incidental to other methods of heating. The amphitheatre is spacious, well lighted, commodious, and in every other respect well adapted to its purpose. It has a capacity of about 60,000 cubic feet.

The seats are of the most approved pattern. They were manufactured especially for our purpose, are wider and more capacious than those with which auditoria are ordinarily furnished, and are correspondingly more comfortable. The seats are arranged in the manner which has been adopted in the German schools, with strict regard to optic and acoustic laws, so that all are equally available and desirable. In short the building, with its appointments, realizes very satisfactorily our aim to promote the comfort and convenience of students, and to offer them the best facilities and opportunities for preparing themselves for their profession that liberality of expenditure and solicitude for success could provide.

COURSE OF INSTRUCTION.

COLLEGE CALENDAR.

The course of study covers two years. The annual session is divided into a preliminary and a regular term. The preliminary term of the session of 1881-82 will begin on Wednesday, the 14th day of September, and end on the 4th day of October, 1881. No fees are charged for instruction at this term, which is devoted to lectures and clinical instruction upon special subjects, with the object of preparing students for the regular term. While students are not required to attend the preliminary course, they are strongly urged to avail themselves of the advantages thereby afforded. The regular term will begin on the 5th day of October, 1881, and continue until about the 1st day of March, 1882. Commencement day will be the 2d day of March, 1882. The lectures will be suspended for the holiday season, from Friday, December 23, 1881, to Tuesday, January 3, 1882.

METHODS OF INSTRUCTION.

The system of teaching at this college combines didactic and objective methods, to the end that the result of the course may equip the graduate with practical efficiency as well as theoretical principles. Thus, by means of clinical and other forms of objective illustration, abstract principles are, as far as possible, made clear by actual demonstration.

OBSTETRICS AND MEDICAL AND SURGICAL DISEASES OF WOMEN.—Instruction in this department is given by lectures, recitations, demonstrations, clinical illustrations and models. Students are instructed in the usual

operations on the manikin, and have the benefits of a course of operative obstetrics, with practical illustration on the cadaver. This department is supplied with a valuable collection of manikins, *papier-mache* and wax models, and other accessories for the purposes of illustration.

SURGICAL AND CLINICAL DISEASES OF WOMEN.—Lectures; recitations; abundant clinical facilities, afforded by the City Hospital, St. Vincent's Hospital, the City Dispensary, the College Dispensary and out-door patients; illustrations on the cadaver; pathological and anatomical preparations; models, etc.

PHYSIOLOGY.—This science is taught by lectures, recitations, models, charts, vivisection. The department is suitably provided with accessories for the illustration of the principles set forth in the lectures.

CHEMISTRY.—Is taught by lectures, recitations, exercises in practical chemistry—analytical and synthetical—and qualitative and quantitative analyses. The lectures on the philosophy of chemistry are practically illustrated by means of experiments and apparatus, thereby enabling the student to acquire an exact understanding of the subject under discussion. Much attention will be given to the foundation of the laws of chemistry, a knowledge of which is so essential to the elucidation of the medical education of the practitioner of to-day. Among the subjects which will receive extended treatment and illustration, particular mention may here be made of electricity in its relation to animal life and its place in therapeutics, the chemistry of *materia medica*, etc.

The instruction in the laboratory will include a very complete course in *Medical Chemistry and Toxicology*.

ANATOMY.—Lectures; practical exercises, including abundant dissection, under the direction of the Demonstrator; recitations, etc. Topographical Anatomy in its relation to surgery will be fully treated. The course in this branch of medicine is in keeping with its central and commanding importance as an exact science, an accurate and thorough knowledge of which is indispensable to the student's fit preparation for the duties of his profession. The ordinary dissections in the rooms devoted to that purpose will be duly reinforced by lectures before the class, illustrated by dissections, by highly magnified projections of the various details on a screen, and by the elegant and life-like wax models, illustrative of pathological anatomy, in the Museum of the College, taken from life by the celebrated anatomical artist M. Tramond, of Paris. Students also receive practical instruction in the method of performing autopsies, and for this purpose are admitted to autopsies made at the City and other Hospitals.

THEORY AND PRACTICE OF MEDICINE.—Lectures; recitations; hospital visits, etc. It will be the aim not only to teach the principles of medicine, but also to thoroughly ground the student in its practical details. Much time will accordingly be given to Physical Diagnosis and special Pathology. Practical instruction in this department is afforded by frequent clinical exercises at the hospitals and at the college. Students are furnished with cases for personal examination, and are called on to make report thereon to the class, where the reports are discussed and criticised. Examinations are held in the hospital wards and in the amphitheatre of the college. In addition to the foregoing, a systematic course of supplementary instruction is given in auscultation and percussion, and in laryngoscopy, thereby affording students superior facilities for the thorough acquisition of practical knowledge of these methods of exploration.

SURGERY.—Lectures; recitations; clinical exercises, etc. The course includes appropriate attention to Surgical Anatomy, Surgical Histology, Minor Surgery, Bandaging and Operative Surgery. Students are furnished with material for repeating the usual surgical operations.

Practical instruction in Clinical Surgery is given at the college and twice a week at the hospitals throughout the session. These advantages give every student the opportunity during the session to witness the performance of all the Capital, and numerous Minor, operations in surgery. The Demonstrator of Anatomy will, from time to time, deliver lectures upon special subjects pertaining to Minor Surgery.

MATERIA MEDICA AND THERAPEUTICS.—The course embraces lectures, recitations and practical demonstrations. For purposes of practical instruction, this department is provided with an extensive collection of medicines, embracing most of the agents now in use, both officinal and unofficinal. Some of these are rare and expensive. The student is thus facilitated in acquiring reliable knowledge of the physical properties and characteristics of the agents which he subsequently may have occasion to employ in his practice.

DISEASES OF THE MIND AND NERVOUS SYSTEM.—Instruction in this important department of practical medicine is given by lectures, recitations, demonstrations and clinical exercises. The growing importance of this division of pathology is fully provided for in the course.

OPHTHAMOLOGY AND OTOTOLOGY.—The course in this department is full and systematic, including lectures, recitations, demonstrations, clinical exercises and practical instruction in the use of the ophthalmoscope. The illustratory apparatus is especially full and complete.

DERMATOLOGY.—Lectures; demonstrations; clinical instruction; illustrations afforded by a valuable collection of artistic wax models, wonderfully true to nature, and illustrating the various types of disease of the skin.

SYPHILIS.—Lectures; clinical exercises; illustrations by means of wax models taken from life in the hospitals of Paris.

LARYNGOLOGY.—Lectures, recitations and clinical practice. It gives us great pleasure to be able to announce that the services of Dr. John M. Dunlap have been secured for a number of lectures before the class.

RECITATIONS.

Systematic examinations of the class by the members of the Faculty will be held daily, such exercises being obviously of great value in testing the progress of the student and of fixing his mind upon the principles and facts to be acquired by him. This feature of the course of instruction will be made as thorough and effective as possible. There will be no extra fee for these personal examinations.

SPECIAL INSTRUCTION.

In addition to the course of instruction for the regular classes, practical instruction for such as desire it will be given in the use of the Microscope, Laryngoscope, the Ophthalmoscope, etc., and in Physical Diagnosis and Minor Surgery.

These studies, though elective, and not requisites for graduation, are important as adjuncts in more thoroughly and comprehensively fitting the practitioner for his future labors, and the instruction therein will be arranged for such hours as will not interfere with the general course.

TEXT BOOKS AND BOOKS OF REFERENCE.

The Faculty would recommend the following works for use as text books, and for collateral reading.

Surgery.—Gross; Ashhurst; Hamilton and Erichsen.

Obstetrics and Diseases of Women.—Leishman; Thomas and Hewitt.

Practice of Medicine.—Aitkin; Flint; Neimeyer; Bristow.

Surgical and Clinical Diseases of Women.—Emmett Barnes.

Anatomy.—Gray; Quain and Sharpey, eighth edition.

Practical Anatomy.—Holden; Heath; Ellis.

Diseases of Children.—Meigs and Pepper, and Day.

Physiology.—Flint; Dalton; Kirke.

Hygiene.—Parkes.

Materia Medica and Therapeutics.—Bartholow; Farquharson; Wood; National Dispensatory.

Diseases of Mind and Nervous System.—Hamilton; Hammond.

Chemistry.—Cooke; Fownes, new edition.

Toxicology.—Woodman and Tidey; Wormley.

Diseases of the Eye.—Wells; Stellwag.

Diseases of the Ear.—Roosa; Buck.

Diseases of the Skin.—Tilbury Fox; Duhring; Erasmus Wilson.

REQUIREMENTS FOR GRADUATION.

The requirements for graduation will be found in number 3 of the Articles of Confederation of the American Medical College Association, page 17 of this announcement.

FACILITIES FOR CLINICAL TEACHING.

THE BOBBS FREE DISPENSARY.

This Dispensary, supported by funds left by the late Professor Bobbs for that purpose, is located in the college building, and will furnish a great variety of Clinical material. Clinical lectures, in connection with this Dispensary, will be delivered on Tuesday and Thursday of each week. The entire afternoon of Wednesdays and Saturdays will be devoted to clinical teaching in the hospital amphitheatres, which is ample for the accommodation of students.

CITY DISPENSARY.

The greater portion of the medical charity of the city is furnished at this Dispensary; nearly five thousand cases are treated annually, covering almost the entire field of medicine and surgery. The city and county have made liberal appropriations for the support of the Dispensary, thus making it one of our permanent institutions. Its location and the plan of its operation render it especially available as a resource for clinical material.

CITY HOSPITAL.

More than three thousand cases, medical, surgical and gynæcological, are received yearly at this institution, and are at the disposal of the Faculty of the College, who are thereby afforded facilities for clinical teaching. The following are some of the operations performed before the class at the last session: lithotomy, excisions of the hip, knee, and elbow-joints; various capital operations in surgery, as amputation of the thigh, arm, etc.; in the department of surgical diseases of women, laceration of the cervix uteri, vesico-vaginal and recto-vaginal fistulæ, etc.; also numerous operations for cataract, strabismus, enucleation of the eye-ball, and other diseases in the field of ophthalmic surgery.

ST. VINCENT'S INFIRMARY.

By the subjoined letter from Bishop Chatard to the Dean of the Faculty, it will be seen that the Faculty of the Medical College of Indiana have been constituted the Visiting Staff of St. Vincent's Infirmary. This hospital is centrally located, and is but a short distance from the College. Clinical lectures will be delivered at the hospital by members of the Faculty at least once a week.

INDIANAPOLIS, IND., June 3d, 1881.

Dr. Theophilus Parvin:

DEAR SIR—In reply to your request for information regarding the Hospital recently opened here, under the name of St. Vincent's Infirmary, and in charge of the Sisters of Charity, widely known for their care of the sick and wounded on the battlefields of the Crimea, and during our civil war, I very willingly give the following details:

This Hospital is intended for a general Hospital, and will be enlarged gradually, according to the wants of the day and the means at hand. It will be under the management of the above Sisters. The interests of all concerned make it desirable that the inmates have the benefit of the medical direction of the Professors of the Medical College of Indiana, who will constitute its staff; though an equal number of the regular practitioners of the city will be invited to become consulting physicians.* There will be a hall for clinical instruction. The capacity of the building allows the Sisters to take care of sixty patients, without crowding. Further enlargements are designed. The charges for patients are:

For private patients, room, board and attendance, per week, ordinarily, \$10.

For ward patients, \$5, and as low as \$3 per week.

Tickets for clinics will be, this session, \$3.

*Private patients can be attended to by physicians of their choice.

At this moment work is going on to furnish the building with elevator facilities, and everything, as far as possible, needed for a modern Hospital.

Thanking you for your kind interest, and begging to tender, through you, to the Professors of the Medical College of Indiana, my grateful acknowledgements for their valuable aid, I am, my dear Dr. Parvin,

Yours, faithfully,

FRANCIS SILAS CHATARD,

Bishop of Vincennes.

ACCESSORIES.

Prominent among recent additions to our apparatus may be mentioned the "college lantern," with a full set of accessories thereto, made especially for this college at the Stevens Institute of Technology, after plans furnished by President Morton. By this splendid instrument objects are projected highly magnified, and the demonstration of their structure, before the entire class at the same time, is made easy and thorough. The great value of this instrument in all departments of medical instruction is so apparent as to make further observation thereon superfluous. We have also supplied the school with that essential accompaniment to the lantern, a dynamo-electric generator having an illuminating capacity of over twenty-five hundred candle-power, and operated by an engine of two and one-half horse-power, especially designed for that purpose, by means of which objects projected are illuminated to any required degree of brightness. This machine admirably realizes a long-sought desideratum, namely, a contrivance for making the electric light available for the steady and constant illumination of objects; and, in addition to its use in conjunction with the lantern, it is a valuable auxiliary for many purposes in the laboratory.

ANATOMICAL ROOMS.

The Anatomical rooms as now arranged are not surpassed by those of any other college in the country. They are light, well ventilated, and every provision has been made that can afford convenience for the prosecution of the study of practical anatomy. Arrangements have been made so that an abundance of material will be furnished at cost.

The Demonstrator of Anatomy and his assistant will be present during the hours for dissection to direct students in their work, and will from time to time give special demonstrations of the anatomy of the parts involved in surgical operations of importance. Nothing will be spared in the effort to thoroughly train the student in this important feature of the course.

CHEMICAL LABORATORY.

The appointments provided for the laboratory are well adapted to their object.

It is the aim of the College to make the course in Chemistry eminently practical, and suited to the requirements of students in the future practice of their profession.

While the analytical processes for the inorganic elements, consideration, special attention will be devoted to Medical Chemistry; Toxicology, so important to the physician in its medico-legal relations, and Urinalysis, a knowledge of which is necessary for accurate diagnosis, will receive their full share of attention.

The most simple and accurate methods for making analyses of Blood, Milk and Urine, will be taught.

Each student will be given every facility to familiarize himself with chemical processes by experiments, conducted under the supervision of the professor of this department.

MUSEUM.

The museum has received numerous and valuable additions. These later acquisitions do not alone consist of the additions of morbid specimens naturally incidental to the growth of a College, but include extensive purchases, made in Paris, of manikins, finely prepared skeletons, and wax models. The collection thus enlarged possesses unusual resources for purposes of illustration in Pathology, Physiology, and morbid Anatomy.

A catalogue containing a complete classification, in accordance with the more recent doctrines of pathologists, will be found in the museum for the use of students.

At stated hours the museum will be open to students—at which time the Curator will be present to make demonstrations.

OSTEOLOGICAL COLLECTION.

The Department of Anatomy has a large collection of disarticulated bones, nicely prepared, for the use of students at their rooms while prosecuting their studies in this department. No charge is made for their use. They may be obtained by application to the Curator.

LIBRARIES.

THE BOBBS MEDICAL LIBRARY—For which the College is indebted to the munificent and professional self-devotion of the late Dr. John S. Bobbs, is an excellent collection, containing many valuable works on medicine and the allied sciences. Several hundred volumes have been added to the collection, making it the most valuable medical library in the State. The books have been selected with great care; so that the library, thus enriched, contains all the new works, approved by the best and most recent authorities, that have been contributed to the literature of the profession by distinguished American, English, German, French and Italian authors. The present Librarian has adopted a system of management which will enable the student to obtain the greatest possible benefit from the use of the books.

It is the design of the Faculty to make the College library a library of reference. Its privileges are extended to both the students and the profession of the State.

THE PUBLIC LIBRARY OF INDIANAPOLIS—Containing many thousand volumes, selected with great care and judgment, will be open to the students of the College. It is a circulating library, and students will have the privilege of using the books free of charge.

THE STATE LIBRARY—Is another large and comprehensive collection, to which the students have access without charge.

The Medical Library is in the College building. The others are conveniently near.

SYDENHAM SOCIETY.

This Society, organized by the students of the College, has been in operation for several years and is a permanent association.

The object of this Society is the discussion of topics of interest to students of medicine.

Students may become members of the Society upon entering the College, and by availing themselves of its advantages, will find it a useful auxiliary.

MISCELLANEOUS.

EXPENSES.

The expenses for the course are as follows—all fees except the graduation fee being invariably payable in advance:

Matriculation fee	\$ 5 00
Laboratory ticket	5 00
Professors' tickets	40 00
Demonstrator's ticket	5 00
Graduation fee	25 00
Hospital ticket	3 00

The matriculation fee must be paid at the beginning of each session, by every student who proposes to pursue any study at this College, as a requisite preliminary to entering upon such study. The only exemptions from this rule are graduates of this College and candidates^{*} for graduation thereat.

The fees for optional partial courses will be at the rate of \$5 for each department of instruction.

The graduation fee of \$25 is payable in advance of graduation, by each candidate for the degree of Doctor of Medicine.

Graduates of this College are admitted free of charge to all the didactic and clinical lectures of the College.

Graduates of other regular schools, who may have graduated three years before the close of any session of this College, will be admitted, on payment of the matriculation fee, to all the didactic and clinical lectures of such session.

No reductions or remissions of the above fees will be granted upon any grounds whatever.

^{*}Candidates are only such as have fulfilled all the requirements for graduation.

THE MEARS GOLD-MEDAL PRIZE.

Prof. J. Ewing Mears, of Philadelphia, son of the late Dr. George W. Mears, the lamented Emeritus Professor of Obstetrics in this College, has authorized us to announce that he will provide a gold medal prize, to be competed for each year, and awarded to the second course student of this College, who shall produce the best thesis on some subject pertaining to the branch of medicine formerly taught by his father in this College.

"Puerperal Fever" is the subject chosen for competitors for this prize for the session of 1881-82. All essays offered in competition must be submitted by January 1, 1882. The medal for last year was awarded to Olin E. Holloway, M. D., of Indianapolis, for the best essay on *puerperal convulsions*.

THE TAYLOR PRIZE FOR PROFICIENCY IN ANATOMY.

A case of instruments, for *post-mortem* investigation, will be presented by J. H. Taylor, M. D., to the second-course student who shall make the best anatomical preparation. This prize is to be awarded on Commencement Day. Each competitor for this prize will be required to deposit his preparation, with his name appended thereto, in the Museum of the College.

APPOINTMENTS TO HOSPITAL AND DISPENSARY.

One resident physician at the City Hospital and two resident physicians at the Dispensary, are appointed from the graduating class each year. These places are awarded by competitive examination: in addition to the honorable distinction which they import, they are practically valuable because of the opportunities for clinical experience which they afford, and also from the fact that the winners of these honors are paid for their services—the annual compensation of each of the appointees to the City Dispensary being free lodgings and five hundred dollars, while the appointee to the Hospital receives his living and a salary of one hundred and fifty dollars a year.

COST OF LIVING IN INDIANAPOLIS.

The expenses of students, under this head, vary in accordance with their individual inclinations and means. Good board and convenient lodgings may be obtained as low as \$3 per week, while more pretentious quarters and accommodations at the leading hotels, would, of course, cost a larger sum.

THE ALUMNI ASSOCIATION.

This Association, pursuant to the desires of the Faculty, keeps an historical record of the Alumni of the Medical College of Indiana, and of the two colleges by the union of which this College was formed. This record is designed to show the address of each member, professional or official positions held, and such other facts in relation to him as may be worthy of record. Every graduate is accordingly requested to put himself in communication with the Secretary of the Association, Dr. Wm. F. Hays, of this city, and thereafter to promptly advise him of all changes affecting the accuracy and completeness of the record.

FACULTY OF MEDICAL DEPARTMENT.

GRAHAM N. FITCH, M. D.,

Emeritus Professor of the Principles and Practice of Surgery.

THEOPHILUS PARVIN, M. D., LL. D.,

*Professor of Obstetrics and Medical and Surgical Diseases of Women,
and Dean of the Faculty.*

JOHN A. COMINGOR, M. D.,

Professor of the Bobbs' Chair of Surgery, and the Principles and Practice of Surgery.

R. N. TODD, M. D.,

Professor of the Theory and Practice of Medicine, and of Clinical Medicine.

THOMAS B. HARVEY, M. D.,

Professor of Surgical and Clinical Diseases of Women.

ISAAC C. WALKER, M. D.

Professor of Diseases of the Mind and Nervous System.

WILLIAM B. FLETCHER, M. D.,

Professor of Physiology, Hygiene and Clinical Medicine.

HENRY JAMESON, M. D.,

Professor of Chemistry, Toxicology and Diseases of Children.

JOHN CHAMBERS, M. D.,

Professor of Anatomy and Clinical Medicine.

C. E. WRIGHT, M. D.,

Professor of Materia Medica and Therapeutics.

J. L. THOMPSON, M. D.

Professor of Diseases of the Eye and Ear.

J. W. MARSEE, M. D.,

Demonstrator of Anatomy and Assistant to the Chair of Surgery.

JAMES H. TAYLOR, M. D.,

Assistant Demonstrator of Anatomy.

WILLIAM F. HAYS, M. D.,

Librarian and Assistant to the Chair of Chemistry.

CALVIN I. FLETCHER, M. D.,

Curator of the Museum.

JOHN C. WALKER, M. D.,

J. A. E. HAUGH, M. D.,

Prosectors to the Chair of Anatomy.

OLIVER WRIGHT, Janitor.

AMERICAN MEDICAL COLLEGE ASSOCIATION.

The Medical College of Indiana is a member of the American Medical College Association. The following are the Articles of Confederation of the Association:

ARTICLE I.—OF THE FACULTY.

The medical members of the Faculty must be *regular* graduates or licentiates and practitioners of medicine, in good standing, using the word "regular" in the sense commonly understood in the medical profession.

ARTICLE II.—OF TUITION.

SECTION 1. The scheme of Tuition shall provide for a yearly systematic course of instruction, covering the general topics of Anatomy, including dissections, Physiology, Chemistry, Materia Medica and Therapeutics, Obstetrics, Surgery, Pathology and Practice of Medicine. The collegiate session, wherein this course is given, shall be understood as the "regular" session.

SEC. 2. Said regular session shall not be less than twenty weeks in duration. This section to go in force at and after the session of 1879-80.

SEC. 3. Not more than one regular session, counting the regular session as one of the two courses of instruction required for graduation, shall be held in the same year.

ARTICLE III.—REQUIREMENTS FOR GRADUATION.

No person, whether a graduate in medicine or not, shall be given a diploma of "Doctor of Medicine," who shall not have fulfilled the following requirements, *except* as hereinafter provided for in Article IV.

SECTION 1. He must produce satisfactory evidence of good moral character, and of having attained the age of twenty-one years.

SEC. 2. He must file a satisfactory certificate of having studied medicine for at least three years under a *regular* graduate, or licentiate and practitioner of medicine, in good standing, using the word "regular" in the sense commonly understood in the medical profession. No candidate shall be eligible for final examination for graduation, unless his term of three years' study shall have been completed, or shall expire at a date not later than three months after the close of the final examinations; this clause to take effect at and after the session of 1879-80.

SEC. 3. He must file the proper official evidence that, during the above-mentioned three years, he has matriculated at some affiliated college or colleges, for two regular sessions, and in the course of the same (except as provided in 4) has attended two full courses of instruction on the seven topics mentioned in Article II. But attendance on the whole of the same shall be equivalent to the requirements mentioned in 3; *provided*, such scheme includes instruction in the seven topics mentioned in Article II, and requires attendance at at least two yearly regular Collegiate Sessions of not less than twenty weeks' duration each.

SEC. 4. The candidate must have passed a personal examination before the Faculty on all seven of the branches of medicine mentioned in Article II.

SEC. 5. He must have paid in full all College dues, including the graduation fee.

ARTICLE IV.—OF HONORARY DEGREES.

An honorary degree of "Doctor in Medicine" may be granted in numbers not exceeding one yearly, to distinguished physicians or scientific men of over forty years of age. But in such case the diploma shall bear across its face the word "Honorary," in conspicuous characters, and the same word shall always be appended to the name of the recipient in all lists of graduates.

ARTICLE V.—OF FEES.

SECTION 1. All fees shall be paid in lawful money, and no promissory notes or promises to pay shall be accepted in lieu of cash for payment of fees.

SEC. 2. No ticket or other certificate of attendance upon college exercises shall be issued to any student until the dues for the same shall have been fully paid.

SEC. 3. The established fees for the exercises of the regular session, except the matriculation fee, graduation fee, and fee for dissections, may be reduced not more than one-half to graduates of other affiliated colleges of less than three years' standing, and to under-graduates of the same who have already attended two full courses of the instruction of the regular session.

SEC. 4. The same fees may be remitted altogether to a college's own Alumni, to graduates of other affiliated colleges of three years' standing—the three years dating from the time of graduation and ending at the close of the regular session for which the tickets are given—to under-graduates who have already attended two full courses of the instruction of the regular session, the latter of which, at least, shall have been in the college making the remission, and to theological students, when not candidates for a diploma.

SEC. 5. The same fees may be reduced or remitted to deserving indigent students, to a number not exceeding five per cent. of the number of matriculants at the previous regular session of the college.

SEC. 6. Under no circumstances whatever, other than the above, shall the Faculties, or any members of the same, grant, *upon their own authority*, any remissions or reductions of established fees. And it is distinctly understood and agreed that the Faculties will discountenance and oppose the authorizing by governing Boards of the admission of individual students upon other than the regularly established charges for their grade.

SEC. 7. Remission or reduction of fees for other exercises than those of the regular session, return to a student of any moneys after payment of fees, or an appropriation of funds of the college for payment of any student's fees, or part thereof, shall be deemed violation of the provisions of this article in regard to remission or reduction of fees.

ARTICLE VI.—OF RECOGNITION OF OTHER COLLEGES.

SECTION 1. No college shall admit to the privileges, accorded in Articles III and V, the students or graduates of any college which, during any period of the student's or graduate's pupilage, shall have been excluded from the list of affiliated colleges recognized by the Association.

SEC. 2. The Constitution, By-Laws and Articles of Confederation were signed by the representatives of the following colleges.

LIST OF CONFEDERATED COLLEGES.

MAY 6TH, 1880.

Jefferson Medical College; College Physicians and Surgeons of New York; Medical Department of University of Louisville; Hospital College of Medicine of Louisville; Medical Department University of Iowa; Chicago Medical College; Medical Department University of Wooster; Detroit Medical College; Cleveland Medical College; Starling Medical College; Medical Department University of Vermont; Medical Department Universities of Nashville and Vanderbilt; Missouri Medical College; Kansas City College Physicians and Surgeons; Miami Medical College; Louisville Medical College; Medical Department Michigan University; Medical Department University of Louisiana; Rush Medical College; Women's Medical College of Chicago; Bellevue Hospital Medical College; Texas Medical College and Hospital; Alabama Medical College; Ohio Medical College; Medical College State of South Carolina; Columbus Medical College; Medical College of Evansville; Atlanta Medical College; Cincinnati College of Medicine and Surgery; Medical College of Indiana; Nashville Medical College; Savannah Medical Colleges.

AN ORDINANCE

—FOR THE—

GOVERNMENT OF THE UNIVERSITY.

OF STUDENTS.

SECTION 19. Students of either sex, of good moral character and habits, shall be entitled to admission into the University. Every candidate for admission as a student must pay the Treasurer of the Institution the tuition fees in advance, for not less than one term. Each student of the age of fourteen years or upwards, when he or she applies for admission as a student, shall procure and read a copy of the By-Laws pertaining to the duties of students, and shall then sign his or her name in a book to be kept for that purpose by the Secretary of the Faculty, stating his or her age and place of nativity, and the name of his or her parent or guardian, under a caption, in the following words: "Having carefully read the By-Laws pertaining to the duties of the students of Butler University, I do hereby subscribe myself student thereof; and I do hereby solemnly promise that during my connection with it, I will faithfully observe and obey its laws, rules and regulations."

SEC. 20. To remain a student in connection with the University, every student is requested to observe the following regulations:

1. Immediately after matriculation, the student shall select from the different schools, with the advice and consent of the Faculty, an amount of study equal to three daily recitations.

2. That the student be diligent in study, and punctual in his attendance upon recitations, examinations and other college exercises.

3. That, having entered any College class, the student shall not leave it without permission of the Faculty.

4. That the student neither introduce nor use upon the premises of the University any intoxicating beverages.

5. That the student do not bring nor use upon said premises any fire-arms, dirk, bowie-knife, or any other kind of deadly weapon.

6. That the student abstain from profanity, the desecration of the Lord's Day, all kinds of gaming, even for amusement, and whatever is inconsistent with good order, good taste and good morals.

7. That the student attend public worship at least once every Lord's Day.

8. That the student be strictly moral in language and conduct, respectful to the officers of the institution, and courteous and kind to all the students of the University.

9. That the student carefully observe all the rules and regulations contained in any part of this Ordinance, respecting fees, societies, and University grounds and buildings.

The marriage of any student, during term time, shall, in the discretion of the Faculty, be regarded as sufficient reason for the disconnection of such student from the institution for the remainder of the term.

OF DISCIPLINE.

SECTION 22. The discipline of the University is confined to the Faculty, under the provisions herein contained. As far as practicable, it shall be parental, and all severe and disgraceful punishment shall be avoided, and appeals addressed to the reason and conscience. But to maintain good order, and to secure the very important objects for which the institution was founded, the Faculty may inflict, at their discretion, according to the character of the offense, any of the following penalties:

1. Private admonition.
2. Public admonition.
3. Suspension for a time, at the discretion of the Faculty.
4. Expulsion.

No student shall be publicly suspended or expelled without an opportunity of being fully heard in his or her own defence; and in all cases of expulsion the party expelled may appeal to the Board within thirty days, in which case the action of the Faculty shall not be final till confirmed by the Board of Directors as soon as they can be called together.

But whenever the Faculty are satisfied that, owing to the habitual idleness, profanity, or any other cause, the presence of a student in the University is unfavorable to its prosperity and the welfare of other students, they may suspend him or her privately, or require the parent or guardian to remove such student immediately from the institution. In all cases of suspension or expulsion the delinquent shall forfeit the fees for the remainder of the term.

SEC. 23. The Faculty may, from time to time, make such prudential regulations pertaining to the social intercourse of the sexes as they may deem expedient.
